and Thomas T. Bauman
Department of Botany and Plant Pathology
Purdue Extension**

**“Grazing and Forage Intervals for Herbicide-
Treated Corn”**

Table 5. Grazing and Forage (Silage, Hay, etc.) Intervals for Herbicide-Treated Corn

This table is a guide for grazing and feeding herbicide-treated corn, and shows the time that should occur between herbicide application and grazing or harvest for silage. For premixes or combinations not listed below, the minimum interval equals the longer of the two intervals for each individual product in the mix. Always consult herbicide labels for specific limitations.

Herbicide	Grazing	Forage (silage, etc.)
2,4-D	7 days	7 days
Aim	none	none
Atrazine	60 days	60 days
Balance Flexx	none	none
Basagran	12 days	None
Beacon	30 days	45 days
Bicep II Magnum/Cinch ATZ	30 days	30 days
Bromoxynil	30 days	30 days
Cadet	90 days	30 days
Callisto	Do not graze	45 days
Capreno	45 days	45 days
Celebrity Plus	32 days	32 days
Corvus	45 days	45 days
Define	None	None
Degree	21 days	21 days
Degree Xtra	21 days	21 days
